

All-New Triton Confirmed as First Double-Cab Pickup Truck to Achieve 2024 Five-Star ANCAP Safety Rating

Tokyo, April 16, 2024 – Mitsubishi Motors Corporation (hereafter, Mitsubishi Motors) announced that the all-new Triton¹ one-ton pickup truck has earned a maximum five-star rating² in the 2024 ANCAP³, which evaluates the overall safety performance of new vehicles in Australia and New Zealand, as the first double-cab pickup to receive the highest rating in the current 2023-2025 protocols.

In December 2023, the all-new Triton also achieved a five-star safety rating in the 2023 ASEAN NCAP⁴, a comprehensive safety performance assessment for new vehicles in the ASEAN region.

Mitsubishi Motors remains committed to its safety philosophy of achieving a mobility society with zero traffic accidents through continued efforts to develop safety technologies and to spread knowledge about traffic safety.

All-new Triton
(Australian spec, double cab)

The all-new Triton adopts the high-rigidity RISE⁵ body that both absorbs energy and minimizes cabin deformation in the event of a crash, as well as seatbelts and eight SRS airbags⁶ designed to provide high levels of occupant protection. To ensure preventive safety performance, safety features such as Active Stability Control (ASC) that prevents skidding and Forward Collision Mitigation system (FCM) with cyclist and pedestrian detection are also standard equipped on all models.

The all-new Triton is Mitsubishi Motors' one-ton pickup truck that traces its roots back to the Forte launched in 1978. In the 45 years since, about 5.7 million units have been produced over five generations and sold in approximately 150 countries around the world, making it one of Mitsubishi Motors' global strategic vehicles.

Developed under the product concept of "Power for Adventure," the all-new Triton features a complete overhaul of everything from the interior and exterior design to the chassis, ladder frame and engine. It was first launched in Thailand – where its production site is located – in July 2023, followed by the Philippines in January, Japan in February, and Australia and New Zealand in March. The all-new Triton will debut sequentially in approximately 100 countries around the world.

1. Sold as L200 in some markets
2. Applicable to all 2WD and 4WD double-cab variants
3. Australasian New Car Assessment Program
4. New Car Assessment Program for Southeast Asian Countries
5. Reinforced Impact Safety Evolution
6. Equipped depending on body type and trim level

About Mitsubishi Motors

Mitsubishi Motors Corporation (TSE:7211) – a member of the Alliance with Renault and Nissan – is a global automobile company based in Tokyo, Japan, which has about 28,000 employees and a global footprint with production facilities in Japan and the ASEAN region. Mitsubishi Motors has a competitive edge in SUVs, pickup trucks and plug-in hybrid electric vehicles, and appeals to ambitious drivers willing to challenge convention and embrace innovation. Since the production of our first vehicle more than a century ago, Mitsubishi Motors has been a leader in electrification – launched the i-MiEV, the world's first mass-produced electric vehicle in 2009, followed by the Outlander PHEV, the world's first plug-in hybrid electric SUV in 2013. With a target of increasing the sales ratio of electrified vehicles to 100% by 2035, Mitsubishi Motors will deliver models that embody Mitsubishi Motors-ness and contribute to the realization of a carbon-neutral society.
